## ALERT CENTER

With the Alert Center, you can easily see what devices in your account have alert notifications, as well as any possible 'warning' events, such as a low battery.

STATUS VIEW

In the Status view you can pause notifications, enter 'Notes', and view the last 30 days of device activity for the device. Additional options based on device.

Real-Time Notifications

Advanced Cellular IoT Connectivity

Weather Resistant
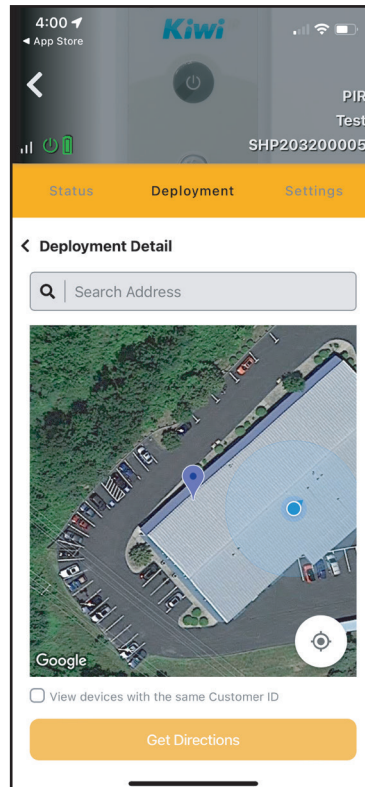

DEPLOYMENT VIEW

The Deployment view allows you to save simple deployment information, update device name and description, and see device location (set at the time of deployment from within the app) on a map view.

SETTINGS VIEW

In the Settings view, you can set your notification preferences, including up to 5 emails and 2 telephone numbers to be included on notifications.
